

12 Free Months of “Astronomy Technology Today”! Tell'em Prescott Astronomy Club Sent You.

Greetings fellow astrophiles!

PAC is pleased to (have been given the go-ahead to) report on a special deal going on for new subscribers to [Astronomy Technology Today \(ATT\)](#) – the announcement made its way into our inbox courtesy of PAC member, John Baesemann and is posted to provide the steps required to take advantage of this unique offer.

Brief, Biased Background

From the ATT website: If you're an advanced star gazing enthusiast or would like to learn more about getting into the hobby, you need to subscribe to Astronomy Technology Today!

We are the only magazine in the world dedicated entirely to telescopes and related equipment. We offer both print and digital versions and as a subscriber you can view every back issue online, which means that you'll have access to over 400 reviews, how to articles, new product introductions, industry news, ATM articles, astrophotography, and much more.

ATT is THE magazine for the committed, equipment-minded amateur astronomer who wants to keep track of the very rapid developments in scopes, CCDs, software, and image processing, just to name a few areas. This is not only evident in the quality of the reviews provided by professional amateurs on all ranges of equipment, but is also evident in the advertisers, including all the big name companies and distributors, but also including many of the very niche markets and suppliers of those “little extras” that you know were borne out of one astronomer's own need to solve a problem. The reviews themselves are always well constructed and exhaustive – seeing someone hammer on a piece of equipment for 6 to 10 pages is not uncommon. I am also privy to some new info that the magazine itself is undergoing a bit of an expansion – no details, but I eagerly await what the next issues have to offer.

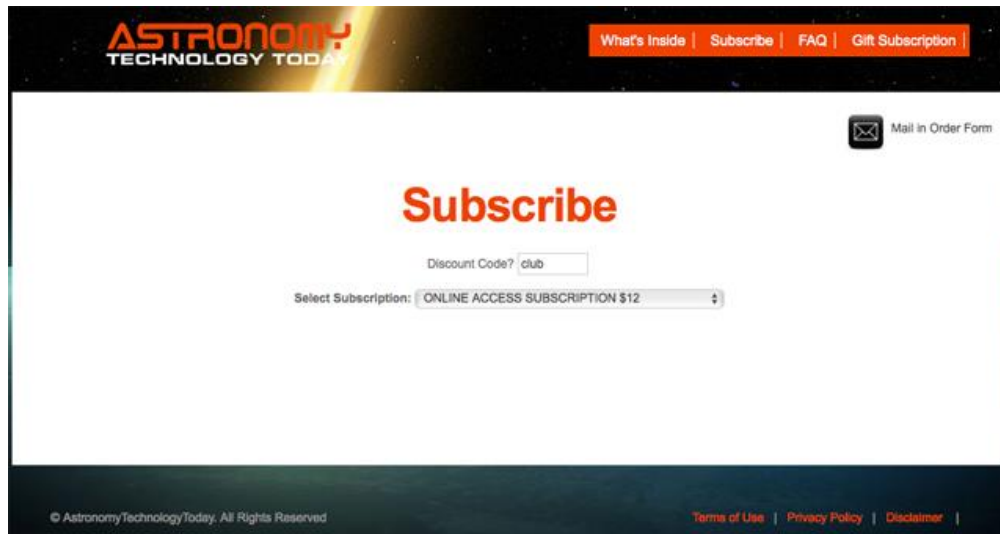

ATT is a wealth of info. And it's already inexpensive! And now even more economically enticing for up-to a year for PAC or other club members.

The ATT Deal!

Follow the link below and use the Discount Code: “**club**” (no quotes, lowercase), then select the **ONLINE ACCESS SUBSCRIPTION \$12** option (as below – note! If your page says “Renew Your Subscription,” this code will not work – blame your cookies).

www.astronomytechnologytoday.com/?l=/sub_store/subscribe.asp

Here are step-by-step instructions for obtaining this offer:

You'll immediately be taken to a **Customer Information** page to fill out. If the first page worked, you'll see a "**Discount for club -\$12**" at the top of the page and a "**USD \$0**" at the bottom.

You're good to go! Fill in the **Customer Information** and skip the **Payment Info**.

Discount for club -\$12

Select Subscription: ONLINE ACCESS SUBSCRIPTION \$12

1x #SUB-Online Only / Online Version of Magazine variations
Online only access annual subscription is \$12 and includes unlimited online access to current and back issues only.
