2020 Information for New Members

Meeting Date:  First Wednesday of every month
Meeting Time:  6:30 PM - 8:30 PM
Meeting Location:  Touchmark at the Ranch, 3180 Touchmark Blvd, Prescott, AZ
(meeting room is in the Grand Lodge straight back from the entrance and on the left by the lounge)

Benefits of Membership
Magazine Discounts – PAC members are eligible for discounts on subscriptions to Sky & Telescope and Astronomy magazines, but as we have learned there are deeper discounts available online.

Public Star Parties – Part of our mission is to promote public awareness of astronomy. PAC sponsors numerous public star parties each year, at Pronghorn Park in Prescott Valley, at the Highlands Nature Center, and at Embry-Riddle’s observatory, and at other venues by request. On our website, click on Club Calendar and Meetings and Events for more details.

Other Outreach – The club has educational outreach programs in local schools, and members enjoy helping young people learn about astronomy and related science. The club partners with the Prescott Public Library in presenting the Third Thursday series of lectures on astronomy and related science topics.

Observing Programs – PAC offers several fun and challenging observing programs designed to enhance your knowledge of the night sky while improving your observing skills, and schedules club star parties for members only.

Learn from Other Club Members – Mentors are available to help you with your equipment, software, websites, general knowledge, and more.

META SIG – Meet-Eat-Talk-Astronomy Special Interest Group -- a social gathering at a local restaurant on the 2nd Wednesday of each month at 5:00 PM.

Astronomical League – As a member of PAC, you are also a member of the League and will receive its quarterly magazine, Reflector. See www.astroleague.org

Access to Club Equipment – The club has telescopes and other items to loan to members.

Astrophotography Special Interest Group – Members get together to learn and share the art of taking pictures of night sky objects.
